What we offer

Surveillance data travels a long and winding road to get to the screens in front of you. And just as they were captured, they need to be presented to the viewers without losing any details. Depending on the details of your installation, many types of obstacles and interference can stand in the way of critical transmission. To make the journey safe and smooth, your data needs a little help.

Hikvision’s transmission product lines offer a wide range of equipment and accessories that do more than just create a complete security system – they transform it into a system that boosts high efficiency and optimal performance.
